Subject: Microsoft Settlement!!!!---Tunney Act Period

Attn: DOJ and Judge: This note is to support the proposed settlement in the Microsoft case. It is about time this case be ended. In all the years of watching litigation, this case is the clearest example I have ever seen of a competitor induced lawsuit. Clearly, the Clinton Adm raised millions and got the Calif. electoral votes in exchange for this case. Further, so called judge jackson railroaded Microsoft in every aspect of the case. As a CONSUMER the prices paid by me and every one else is essentially nominal to the benefits realised by use of this software. Each computer based ahrdware and software company seeks to use their innovation over the competition. These competitors just dont have the skill and talent to realize the kind of success that has come to Microsoft. Please put an end to this matter as clearly as can be done. Thank You!! David R. Gray, Esq. (drgesq2@aol.com)
